Although a bit hectic, I managed to snap a few photos and give some personal thoughts on the debut novel of Peter Corcoran. I must confess that the book was released a while ago, but due to the nature of the novel (a love triangle) some of you might have missed it, or even that it's been out there for ages. What I want to do here, is give you a few personal thoughts on the characters and the book, as well as give you a bit of a tease of what's to come in the second half of the

novel. First of all, let me thank the author Peter Corcoran for being there in person. He is a genuinely nice guy and I was honoured to get to meet him. The author was kind enough to sit and chat for a while, as well as answer some of the questions that had been raised. Our meeting was a bit unfortunate, as during the conference I had managed to lose my glasses, and in the rush I forgot about it. Much like the adidas Boost trainers, the silhouette has been a staple in the retro scene since its inception. Now, the release of the third installment is set to add some more flare to the retro line. The new Air Jordan 4 Metallic "UNREAL" is inspired by the style of the "UNREAL" shoe from the 2006 film adidas meets Jordan. The kicks feature two-toned tones that are said to be an amalgamation of the metallic styles and the metallic upper of the "UNREAL". The Adidas BOOST TUTS is also set to be released in early October. The $120 trainer features a wide array of details like the "UNREAL" panels and 3M reflective accents. The range is covered by an in-game series of photos that, if not for the realistic look of the kicks, would depict an updated take on the "Light the Night" theme. adidas BOOST TUTS x Air Jordan 4 Metallic "UNREAL" Release Date: October 2017 $120 Available in-game Images via adidas
