Important Photoshop Features The following features are essential to any image editor, but Photoshop has been expanded in some key areas: Pros and Cons of Photoshop So what do we love and hate about Photoshop? Our Pros Convenient Cost $300 Cons Not as powerful as other programs Partial interface incompatibility with other programs Color Features Photo retouching Image manipulation File formats Powerful Price $200 – $300, depending on the version, additional video tutorials, and whether you buy additional software PSD file Raster Vector File formats One of the reasons Photoshop has become the industry standard is because of its interface. It is extremely easy to operate, allowing both seasoned photographers and beginners to feel like they can manipulate images the same way an experienced photographer would. However, it is important to remember that not everyone is a fan of Photoshop. In some industries, a layered file with lots of transparency may not be a good choice. Despite what many people think, Photoshop is not the only choice for manipulating images. Support Communities DigitalPhotographySoup.com also offers a forum where Photoshop users can discuss their favorite techniques, tricks and also share resources. This site is one of the first image manipulation websites and it was established in 1995 by Scott Nessell. All of the discussions are focused on image manipulation, even if one of the members is photographing an event. Q: Create SQL Database Script I need to create SQL database scripts in the following format. CREATE TABLE IF NOT EXISTS [dbo].[Table1] ([Column1] [nvarchar](50) NULL, [Column2] [int] NULL, [Column3] [nvarchar](50) NULL, [Column4] [int] NULL, [Column5] [nvarchar](50) NULL, [Column6] [nvarchar](50) NULL, [Column7] [int] NULL, [Column8] [nvarchar](50) NULL, [Column9] [int] NULL, [Column10] [nvarchar](50) NULL, [Column11] [nvarchar](50) NULL, [Column12] [nvarchar](50) NULL) ON [PRIMARY] GO It might be that there will be hundreds of tables. So is there a way to copy this many rows and columns into a file in this format. A: You can use sp_MSforeachtable to generate dynamic script for all tables. Note: This is one of most powerful and easy-to-use command-line TSQL command. Q: How to add "UPDATE" function to the "select" query? I am working with one table which has 12 columns, out of which I have to fetch some columns into a new table, which should have 6 columns, so I need to add three extra columns from the original table. I was able to fetch these columns in the second table, but when I was adding the column names for each column to check their values in the third table, I found that some of the column names were not being added. Can someone tell me how to add an extra column name in select statement? The query I have been using is as follows. SELECT
